Avid fan of all things technology and dedicated full stack developer seeking creative and engaging opportunities with companies that help solve real world problems.

Employment History

David Thrasher Development *2017 - Present*
My freelance development business where I've created a variety of websites for clients. Duties include graphic design, HTML5, CSS3, Javascript/jQuery, and responsive coding. Interfacing with clients, potential clients, and day to day operations.

In Motion Recordings *2015- Present*
Recorded/produced project pre-production using Pro Tools and latest state of the art recording processes. Projects included working closely with clients as liaison to bridge the gap between their creative vision and the technology that is needed to record a clean and polished product.

Guitar Center *2012 - 2015*
Managed the guitar department, employees, sales, and operations.

Past Projects

Conquer Recordings *2017*
Website created for a client's recording studio, Conquer Recordings. Utilizes HTML, CSS, JavaScript, Materialize, and PayPal buttons.

View the site in action here: http://www.conquerrecordings.com/

SpamTastic *2017*
Creator of main concept and lead JavaScript developer of a group of four. Utilizes HTML, CSS, JavaScript, Bootstrap, Ajax, and multiple White Pages API's.

View the site in action here: https://spam-tastic.herokuapp.com

The Great DB8 *2017*
Developed majority of front end design/UI, worked heavily in routing with express/handlebars, and helped design database schema.
